Reclaiming the land

JOHN H.K. RILEY

RUN ON THE BANK - Although the Sebastopol area has received about half as much rain as a year ago, there still has been enough precipitation to cause the Laguna de Santa Rosa to overflow its embankment several times this winter. The most recent occasion was last Wednesday after 2.02 inches fell. The above scene was off High School Road, just north of the Don Head Bridge, and recalls a time when the laguna was used by the citizenry for recreational purposes.
