Laguna de Santa Rosa Foundation
INTERNSHIP OPPORTUNITY

Our Stewardship Program is now accepting internship applications for the Spring 2027 Semester!

The **Laguna de Santa Rosa Foundation** offers students an opportunity to explore ecological restoration while deepening their understanding of the Laguna de Santa Rosa watershed. Through hands-on experiences in habitat restoration, native plant propagation, conservation science, and invasive plant management, interns develop practical field skills alongside experienced Foundation staff. This internship emphasizes supervised learning, mentorship, and community-based conservation, preparing students to explore careers in environmental restoration and natural resource management.

- **Gain experience in conservation science** through vegetation monitoring, plant surveys, and restoration activities in local habitats;
- **Develop communication and collaboration** skills by working alongside Foundation staff, volunteers, and community members during stewardship activities;
- **Explore environmental career pathways** while learning how restoration and community stewardship contribute to healthy, resilient ecosystems!

The Laguna de Santa Rosa Foundation is a watershed-based 501(c)(3) nonprofit organization in Sonoma County. We work to restore and conserve the Laguna and its surrounding watershed while inspiring our community to appreciate and protect this vital resource.

Internships require a 90-hour commitment in Santa Rosa, CA, and must be completed for academic credit. Our program aligns with college semesters at Sonoma State University and Santa Rosa Junior College, although students attending other schools are encouraged to apply. A $1,630 participation stipend is included.

Apply early! Intern selection begins December 14, 2026.
